Art Unit: 1714

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, drawn to compositions, classified in class 252, subclass 367.1 among others depending on the exact ingredients therein and the intended use of the composition.
  - II. Claim 25, drawn to method of washing body parts, classified in class 134, subclass 42 .
  - III. Claim 26, drawn to method of washing fabric/garment, classified in class 8, subclass 137.
  - IV. Claim 27, drawn to method of cleaning a hard surface, classified in class 134, subclass 22.19 among others depending on the nature of the substrate.
  - V. Claim 28, drawn to method of treating a plant or crop, classified in class 504, subclass 363.
  - VI. Claim 29, drawn to a method of drilling for oil, classified in class 507, subclass 103 plus.
  - VII. Claim 30, drawn to a method of fighting fire, classified in class 252, subclass 2 plus.

2. The inventions are distinct, each from the other because of the following reasons:  
Inventions of groups II-VII are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 1714

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects.

3. Inventions of group I and groups II-VII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used differently than in either of the uses of groups II-VII as evidenced by the use of a different group than that observed.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

Distinct Species I: zwitterionic polymeric suds stabilizer,

Distinct Species II: Detersive surfactant,

and Distinct Species III: carriers and other adjunct ingredients.

Art Unit: 1714

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the single species of each of groups I to III that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Niland whose telephone number is (703) 308-3510. The examiner can normally be reached on Monday to Friday from 9:30 to 6:00.

Art Unit: 1714

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on (703) 306-2777. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-5408.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
